RealGuard® Announces the Launch of the Real Estate Agent Safety On-line Network (REASON)

The REASON lets industry leaders band together to build a safer work environment.

Bothell, Washington— September 16, 2004 — RealGuard, a division of Misiu Systems, LLC, announces today the launch of the Real Estate Agent Safety On-line Network (REASON), which allows the leaders of the real estate industry to exchange safety ideas and tips, and to spread news and information that will help agents be more informed of safety issues and concerns in the workplace.

The on-line bulletin board system is designed to make it easy for real estate associations to keep up with current safety news and events concerning real estate agents. By giving them access to the most recent reports they can easily disseminate pertinent information to their membership.

“With several violent attacks against agents each month nationwide we feel that it is important to get the information out to the community. We believe that the REASON can act like our industries own Amber Alert,” said Todd Hodgen, founder and CEO of Misiu Systems, which developed the RealGuard® Personal Alarm System. “We are purposely launching this service coincident with REALTOR® Safety Week with the hope that the entire community will continue to focus on safety throughout the year.”

The REASON is a closed community forum for exchanging safety ideas, tips, and for the spread of news information that will help agents be more informed of safety issues and concerns in the workplace. Membership is free and it is open to all MLS boards, Real Estate Associations, law enforcement agencies and Brokerage Offices. For more information or to sign up go to www.realguard.com/reason.
